

Assignment 1: Installation of Hypervisors and initiation of VMs with image file.
Install and configure an open-source hypervisor and create/instantiate a Virtual Machine (VM) using an existing image file. Demonstrate the successful installation and execution of the VM.

Tasks

- Install an open-source hypervisor such as Oracle VirtualBox
- Obtain a suitable VM image/ISO file.
- Create a new VM using the hypervisor.

- Configure the VM's CPU, RAM, storage, and network.

- Attach the image/ISO file to the VM.
- Start and boot the VM.

Ubuntu 22.10

- Complete the guest OS installation, if required.

- Verify that the VM is running successfully.

- Installing the required build tools and Linux kernel headers using the below commands: `sudo apt update` `sudo apt install -y build-essential linux-headers-$(uname -r)` • Record the configuration and capture relevant screenshots.
